

Warranty for Windpro® Storm Banner Bracket Hardware

WindPro® Storm Brackets are warranted for a period of two (2) years from the date of DisplayStar invoice against defects in material and workmanship when installed according to WindPro® installation instructions and when used to support banners 24" x 48" or smaller.

WindPro® Storm Brackets are warranted to withstand wind gusts up to 70 MPH when used with banners measuring 24" wide by 48" or smaller and the fiberglass rods are epoxy mounted to the bracket.

Also, bracket installation should be inspected 30 days after the initial installation and every 60 days thereafter, making any necessary adjustments immediately. This warranty does not apply where equipment is used, or installation performed, in any manner contrary to WindPro® specifications and instructions, nor where equipment is altered or modified. Excessive force (hammering, etc.) is not necessary and will damage the casting and void the warranty. Nor does this warranty cover installation or removal costs incurred by customer.
